**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-29 have been examined and are pending.

***Claim Rejections - 35 USC § 101***

2. Claims 1-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims as presently claimed and best understood were considered in light of the new "Examination Guidelines for Computer-Related Inventions" and were found to be non-statutory. Discussion of the analysis of the claims under the guidelines follows.

The specification has been reviewed to see if the disclosed invention is in the technological art and that it has a practical use in the art. The review shows that the system uses a computerized method or system to achieve the sale of products such as airline tickets and automobiles to buyers who have submitted a purchase offer.

It is noted that method claim 1 fails to recite/define a computer, machine or device that would render the claim in the technological arts and in statutory status.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claim 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "substantially..." renders the claims indefinite and vague.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3621

6. A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1 rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application

Publication No. 2005/0027617 A1 to Jeffrey M. Zucker et al.

8. As per claim 1, Zucker clearly teaches a method for making an anonymous computerized commerce transaction involving the delivery of digital merchandise comprising:

sending first sensitive information from a first entity to a first intermediate entity (See Zucker abstract, figures 1-12 and associated text, paragraphs [0015]-[0020];

processing said first sensitive information at said first intermediate entity (See Zucker paragraphs [0047] and [0059]-[0067]);

creating first non-sensitive information operable to approve said transaction by said first intermediate entity (See Zucker paragraphs [0048]-[0051]);

sending said first non-sensitive information to a third entity operable to perform said transaction (See Zucker paragraphs [0048]-[0051] and [0083]-[0085]);;

performing said transaction at said third entity, and transferring said digital merchandise to said first entity via a delivering entity comprising information operable to deliver said digital merchandise to said first entity without revealing said first sensitive information to said third entity (See Zucker paragraphs [0048]-[0051], [0083]-[0085], and [0113]-[0119]).

9. As per claims 6-9 and 10-23, Zucker clearly teaches a method according to claim 1 wherein said method further comprises a second intermediate entity operable to receive second sensitive information from said third entity and operable to process said second sensitive information and operable to create second non sensitive information operable to be sent to said first entity without revealing said second

Art Unit: 3621

sensitive information said second non sensitive information operable to approve said transaction and such different combination of entities to obfuscate the original entity (See Zucker paragraphs [0126]-[0127]).

10. As per claims 24-25, Zucker clearly teaches a method according to claim 1 wherein said method further comprises a third intermediate entity operable to receive third sensitive information from said third entity and operable to process said second sensitive information and operable to create third non sensitive information operable to be sent to a fourth entity without revealing said third sensitive information, said third non sensitive information operable to approve said transaction (See Zucker paragraphs [0033]-[0051], [0056]-[0067], [0083]-[0085], and [0113]-[0119]).

***Claim Rejections - 35 USC § 103***

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 2-5 rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application Publication No. 2005/0027617 A1 to Jeffrey M. Zucker et al.

13. As per claims 2-5, Zucker clearly teaches a method according to claim 1, what Zucker is not explicit about is the said merchandise comprises digital video, audio, and software content. However, it would have been obvious to one having ordinary skill in the art at the time the current invention was made to consider the merchandise or the item to be delivered is in digital form for the motivation of the additional flexibility of delivery as well as enhanced choices of merchandise.

14. Examiner has pointed out particular references contained in the prior arts of record in the body of this action for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.
